

## **Gyula KOVÁCS**

Gyula is a professor of cognitive neuroscience at the University of Jena. His main interest lies in vision and some unique aspects of human visual perception, including face recognition and the importance of visual learning in visual perception. His recent paper on this topic has raised quite some international attention ([http://www.eurekalert.org/pub\\_releases/2014-05/fj-sia052114.php](http://www.eurekalert.org/pub_releases/2014-05/fj-sia052114.php)).
